## PROFESSIONAL SUMMARY

Full Stack Developer with more than 5 years of frontend development experience and over 2 years of full stack development experience. Proficient in Vue.js, Nuxt, React, Angular, Node.js, and NestJS, with hands-on experience building web applications, mobile applications, dashboards, automation bots, and internal enterprise systems. Skilled in requirements analysis, system architecture, API integration, deployment, and cross-functional collaboration with clients and development teams. Also experienced in team supervision and project coordination, with a strong ability to learn and apply AI tools to improve software development efficiency.

## WORK EXPERIENCE

**Middle-level Developer, KISRA Co., Ltd.** **September 2, 2024 - Present**

- Develop software based on tasks and requirements assigned by the Business Analyst (BA).
- Build both frontend and backend components according to Software Requirements Specification (SRS) documents
- Implement user interfaces and system functions based on UI designs provided by the design team
- Research and apply new technologies to improve system development and integration efficiency

**Full Stack Developer, HBA (Thailand) Co., Ltd.** **July 1, 2023 - August 30, 2024**

- Designed user interfaces for desktop applications, mobile applications, and websites
- Developed frontend and backend systems based on approved UI designs and selected technology stacks
- Installed and configured Linux and Windows servers, and deployed websites and databases
- Assigned work to team members, monitored progress, and reviewed deliverables against requirements and user feedback

**Front End Developer, Goody Solution Co., Ltd.** **June 1, 2020 - June 29, 2023**

- Developed assigned web applications and integrated them with backend services through APIs
- Tested systems before delivery for user acceptance testing
- Gathered user requirements, assessed feasibility, and supported system planning
- Installed and configured customer systems on Linux servers
- Implemented user interfaces and system functions based on designs supplied by the design team

**Junior Programmer, AVESTA Co., Ltd.** **May 1, 2019 - May 31, 2020**

- Developed websites based on UI designs and integrated applications with backend APIs
- Tested personal and team modules after development completion
- Maintained project CI/CD pipelines on Microsoft Azure
- Assigned tasks, monitored team progress, and planned Scrum meetings
- Reviewed and resolved quality issues based on feedback from the testing team

**Frontend Development :** HTML5, CSS3, SCSS, Vue.js, Nuxt, AngularJS, Angular, React, Tailwind CSS and Bootstrap

**Mobile Development :** Flutter, Kotlin and Swift

**Backend Development :** Node.js, NestJS, ASP.NET Core, Go and PHP

**Database :** MySQL, PostgreSQL and MariaDB

**API, Authentication & Integration :** REST API, Swagger / OpenAPI, Postman, JWT, OAuth 2.0, Social Login (Google, Facebook and Apple) and Microsoft Entra ID SSO

**Automation & Web Crawling:** Playwright, Chromium, Browser Automation, Web Crawling and Scheduled Jobs

**Data Visualization :** ECharts, Highcharts and Power BI

**Cloud / DevOps :** Docker, CI/CD, Linux, Windows Server and Plesk

**Development & Collaboration Tools :** Git, GitHub, GitLab, Bitbucket, Jira, Figma, VS Code, Visual Studio, Android Studio, Xcode, DBeaver, n8n and Termius

**AI-Assisted Development :** ChatGPT, Codex, Claude and Gemini

## SELECTED PROJECTS

**Human Resource Management System (HRM)**
Developed an internal system for managing employee information and human resources operations.
**Technologies :** Angular, Bootstrap, SweetAlert

**Koi Auction – https://koiauction1.com**
Developed an online auction platform supporting product management and real-time bidding.
**Technologies :** Angular, Bootstrap, SweetAlert

**E-Saraban SOC**
Developed an internal electronic document management system for the Secretariat of the Cabinet.
**Technologies :** Angular, Bootstrap, Tailwind CSS, SweetAlert

**Goody Solution Corporate Website – http://www.goodysolution.com**
Developed a corporate website for company information and public relations.
**Technologies :** Angular, Bootstrap

**Solar Maintenance Management System**
Developed an internal system for maintenance tasks, equipment requisitions, and site-visit scheduling for Energy Green Plus.
**Technologies :** React, TypeScript, Tailwind CSS

## SELECTED PROJECTS (CONTINUED)

### Investigation and Relationship Network Analysis System
Developed an internal platform for analyzing data and relationship networks for Provincial Police Region 9 in Yala.
**Technologies :** Angular, Bootstrap

### Quotation, Invoice and CRM System
Developed an internal system for quotations, invoices, and customer data management for SWN.
**Technologies :** React, TypeScript, Tailwind CSS

### Aurora Branch Management System
Developed an internal platform for managing branch information and operations for Aurora Gold.
**Technologies :** Vue.js, Nuxt, Nuxt UI, Tailwind CSS, NestJS

### Siam Piwat SEO Analytics Dashboard
Developed an internal SEO analytics dashboard and statistical reporting system with enterprise single sign-on.
**Technologies :** Vue.js, Nuxt, Nuxt UI, Tailwind CSS, Azure SSO, ECharts, NestJS

### NT SEO Analytics Dashboard
Developed an internal SEO analytics dashboard, automated data collection workflow, and statistical reporting system for National Telecom.
**Technologies :** Vue.js, Nuxt, Nuxt UI, Tailwind CSS, ECharts, Highcharts, NestJS, Playwright
